PROFESSIONAL SUMMARY

Software engineer with **nearly four years** building and shipping production applications, with **488 merged pull requests and 573 peer reviews** across six engineering organisations. Hands-on experience with **React, TypeScript, JavaScript and REST APIs**, delivering onboarding, marketplace, payments and integration workflows. Contributed to **Operate, a Claude Code-enabled incident-investigation platform**, including Claude-assisted feature delivery. Works across frontend, backend, automated testing and CI/CD, with a focus on code quality, application security and production reliability.

488	573	2,958	14	6

CORE TECHNICAL SKILLS

Frontend: React, React Hooks, Next.js, HTML5, CSS3, Tailwind CSS, SCSS/LESS

Languages: TypeScript, JavaScript (ES6+), Python

AI: Claude-assisted development, Claude Code-enabled applications, OpenAI, Gemini, semantic search

Mobile: React Native, Expo, React Native CLI, App Store & Play releases

Backend: Node.js, Python/Flask, MongoDB, Redis, BullMQ, REST APIs, multi-tenant architecture

Infrastructure: Docker, GitHub Actions, CI/CD, DigitalOcean, AWS CloudWatch

Quality: Mocha/Chai, Cypress, pytest, SonarQube, code review, automated testing

Practices: Agile, OAuth, RBAC, application security, analytics instrumentation

PROFESSIONAL EXPERIENCE

Software Engineer - Better Software (Jalan Technologies)

Nov 2022 - Aug 2026

bettrsw.com · Remote

Delivered client products across web, mobile and backend services. Contributed to Operate and shared **node-react, flask-react and react-native** service templates used to initialise new projects.

Operate - AI incident-investigation platform

2026

React / TypeScript frontend · Python / Flask backend · Six merged contributions

- Contributed to a self-hosted platform integrating **Claude Code, reusable skills/runbooks, scheduled agent execution and streamed tool activity** for root-cause analysis and human review.
- Delivered the **React/TypeScript Slack Settings UI**: admin-only navigation, guided setup modals, connection status and disconnect controls, integrated with typed REST services and OAuth endpoints.
- Used **Claude-assisted development** in Slack integration delivery, including setup validation, actionable OAuth errors, modular UI components and automated backend tests.
- Implemented **AWS CloudWatch log-provider support and proactive alerts** with case creation and repeated-event handling. Added **PostgreSQL/MySQL read-only providers** and custom GitLab host configuration.

Recco (Hi5Talent) - talent & coaching marketplace

2024 - 2026

reccojoy.com · 342 pull requests merged and 362 reviewed across mobile, web and API codebases

- Built the **multi-tenant employer platform from an empty repository**: signup, email verification, organisation onboarding, opportunity authoring with draft/publish and visibility controls, applicant review, automated closure, settings and dashboards.
- Designed and shipped the **coach/consultant marketplace across API, React Native and web**, enabling coach discovery, booking, self-service onboarding and payouts. Backend delivery included **25 integration specifications**.
- Built the **Stripe Connect payments layer** with Checkout and destination charges. Calculated amounts server-side and verified webhook signatures for settlement, expiry, asynchronous failure, refund and account-update events.
- Led an **application-security hardening pass**, closing IDOR vulnerabilities across six subsystems through route- and service-level ownership checks; added Cloudflare Turnstile to protect OTP flows.

Recco (Hi5Talent) - continued

- Built AI features: an **OpenAI ReAct enrichment engine**, streaming in-app companion, booking support with human escalation, Gemini video analysis and semantic candidate search.
- Delivered event-driven feeds and Communities workflows with membership, privacy controls, announcements and invitations. Owned the **Recco Aura React Native app** and iOS/Android releases.
- Improved CI with **per-PR Android builds and changed-file linting**; integrated Mixpanel cohorts with OneSignal push segments, contributing to a 30% engagement improvement.

My Solar RX - solar customer-management platform 2026

Python/TypeScript backend + React Native client · 16 merged pull requests in a three-week engagement

- Shipped a **Redis-cached energy sync worker and authenticated REST endpoints**; migrated production charts and neighbour comparisons to backend energy stores.
- Upgraded React Native to the New Architecture with React 19; added push/email delivery, deep-link password reset with web fallback and a daily admin alert digest.

Kizuna Care - care-coordination platform 2025

React Native application and shared CI/CD tooling · 12 merged pull requests, 23 peer reviews

- Delivered appointment payments, family/caregiver booking, radius-based caregiver matching, email/SMS notifications, appointment reminders and MongoDB connection caching.

Pinch Lifestyle - hospitality staff management 2023 - 2024

91 pull requests merged, 163 peer reviews

- Built authentication, OTP, user and facility APIs; integrated **WhatsApp Business Cloud API**, geotagging and multi-facility switching. Managed a **production domain migration across web and mobile**.

Additional roles: Software Engineer, Artica (Apr - Sep 2024) · Software Engineer, Sunny Energy LLC (Nov 2022 - Aug 2023)

SELECTED WORK

- **github-ci** - shared CI/CD library. Added test-coverage export on pull requests, fixed monorepo caching and Docker image cleanup, and simplified configuration; pipeline work improved deployment speed by approximately **25%**.
- **Open source** - automated-ai-code-review, a GitHub Action for AI-assisted PR review; html_to_quill_delta, a Python library converting HTML to Quill Delta rich text.
- **React Native library maintenance** - maintained production compatibility patches for image/video libraries; opened an upstream react-native-fast-image compatibility fix.

EDUCATION

Bachelor of Technology, Computer Science & Engineering 2019 - 2023

Babu Banarasi Das Northern India Institute of Technology, Lucknow

CGPA 8.04 / 10 - First Division with Distinction

CERTIFICATIONS & RECOGNITION

- Triplebyte Certified
- Web Development (Django, AI-based) internship - Psyber Incorporation
- Web Development internship - Borgfy
- GitHub: Pull Shark ×3, Pair Extraordinaire ×3, Quickdraw, YOLO
